

# One-page presentation of Erasmus+ support service

## Who we are

"Mobility and cooperation" is an innovative education startup dedicated to facilitating Erasmus+ mobility and cooperation opportunities. Our "Teachersrise" initiative, an integral part of "Mobility and cooperation", focuses on enhancing teacher training and professional development of teachers. We are passionate about enabling teachers to access new learning experiences and encouraging the exchange of knowledge and best practices and to make a positive impact on their organisations, learners and communities.

## Who should use our support service

Teachers and school staff **with any level of Erasmus+ experience**, including little or no experience at all, are the ideal users of our support service to cultivate professional growth, to gain international exposure, and to enhance educational practices. We selected two specific types of Erasmus+ projects: "*KA122 Short-term mobility projects*" and "*KA210 Small-scale partnerships*", which are a great gateway to Erasmus+, especially for organisations with little experience or no experience at all! Join us in this exciting journey!

## What support we can provide

Understanding the differences between KA122 and KA210 is crucial when deciding which one suits your organization best... **and we recommend embracing them both!**

- KA122 is all about mobility and supports activities that involve traveling to different countries: we are specialised in teacher training courses abroad! In contrast, KA210 emphasizes cooperation, promoting innovation, exchange of experience, and know-how among project partners.
- KA122 allows for a maximum number of mobilities, while KA210 typically features fewer mobilities.
- The time commitment to prepare a KA122 application is higher than that for multiple KA210 applications.
- First round deadline for KA122 is usually February and for KA210 is usually March, every year.

Here's what we provide:

### For KA122 (Mobility for teachers):

- **FREE webinar series** that guides you through the Erasmus+ Programme, project funding, and project management.
- **FREE feedback reports** to help you write your KA122 application.
- **FREE online consultation sessions** after receiving feedback reports.
- Join at the most convenient time!

### For KA210 (Cooperation):

- **FREE matchmaking platform** connecting organisations with similar interests, simplifying the partnership building process.
- **FREE project ideas**, ensuring budget clarity and alignment with topics, activities and needs.
- **FREE professionally written application drafts** for each project idea you accept.
- Limited places available

Our support service is FREE because we believe in the approval and success of our projects: we are your committed partners and so we take the initiative and share in the risk from the preparation stage.

## Register NOW

If you are new to Erasmus+ or to us, we strongly recommend watching the **introductory video** (Duration: 45 min) to learn about our support service. By engaging with our service, you can benefit from our expertise and network to enhance your chances of a successful application and project execution. Whether you're interested in mobility (KA122) or cooperation (KA210) or both, our support service is tailored to your needs. Register with us, and embark on the Erasmus+ journey of educational transformation and growth!
